

# Consumer Council for Water PR19 – Draft Determination Research Phase 2 – Summary Reports

#### **Executive Summary – Southern Water**

548 Southern Water customers were interviewed, 97 face to face via Computer Assisted Personal Interview (CAPI) and 451 online interviews. Fieldwork dates ran from 6<sup>th</sup> August – 16<sup>th</sup> September 2019. Data were weighted in order to reflect the population of the Southern Water customer base. All bill amounts shown to customers included forecast inflation. Customers were initially asked about the proposed change in the bill (uninformed responses), before being given information about the proposed service changes to consider alongside the bill change (informed responses).

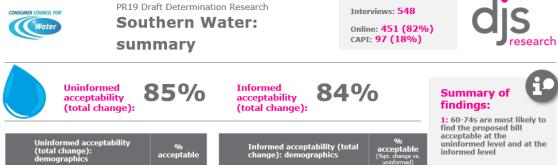

In terms of the total bill change:

- Acceptability falls by 1% from 85% for uninformed responses to 84% for informed (although this is not significant);
- Uninformed acceptability generally increases with age up to 60-74; those aged 60-74 are most likely to find the uninformed total bill change acceptable (90%), significantly higher than 16-29s (71%);
  - However, at the informed level, 16-29s are more likely to find the proposed bill acceptable with a 10pt increase in acceptability from uninformed to informed
- Just under three-quarters (72%) find the bill range for performance incentives acceptable

#### Summary of methodology

A quantitative approach was adopted, with the majority of interviews conducted via an online survey. Additional interviews were conducted face to face using Computer Assisted Personal Interviews (CAPI). The online interviews, collected via panel providers, were used to get a representative sample of customers within the Southern Water region. CAPI interviews were conducted to ensure that the 'offline' population were also represented in the sample mix. Data were weighted to match the customer profile of Southern Water.

A full breakdown of sample groups is shown at the end of this report (page 9) and the questionnaire and showcards on the following pages.

| demographics                      |     |  |  |  |

| Metered   | <b>84%</b> (-2)                                    |  |
| Unmetered   | <b>87%</b> (+4)                                    |  |
| Priority Services Regist                            | er   |  |
| On Priority Services Register                       | <b>90%</b> (+1)                                    |  |
| Not on Priority Services Register                   | <b>84%</b> (-1)                                    |  |

3: Metered customers tend to find the proposed bill more acceptable at the uninformed level while unmetered customers find the proposed bill more acceptable at the informed level.

4: Those on the Priority Services Register are more likely to find the proposed bill acceptable than those not on the register at both the uninformed and informed levels

#### **Top reasons for finding proposed bills acceptable / unacceptable:**

| Top reasons for finding aspects of<br>proposed bill change acceptable          |          |  |
|--|----------|--|
| Informed acceptability: water  | services |  |
| There is little or no change to my bill  | 38%      |  |
| I support what they are trying to do in the long term                          | 30%      |  |
| Because of the price decreases   | 23%      |  |
| Informed acceptability: sewerage services                                      |          |  |
| Because of the price decreases   | 37%      |  |
| I support what they are trying to do in the long term                          | 28%      |  |
| Their plans seem to focus on the right things                                  | 27%      |  |
| Informed acceptability: combined plan  |          |  |
| There is little or no change to my bill  | 33%      |  |
| I support what they are trying to do in the long term                          | 32%      |  |
| Their plans seem to focus on the right things/The plan is good value for money | 30%      |  |

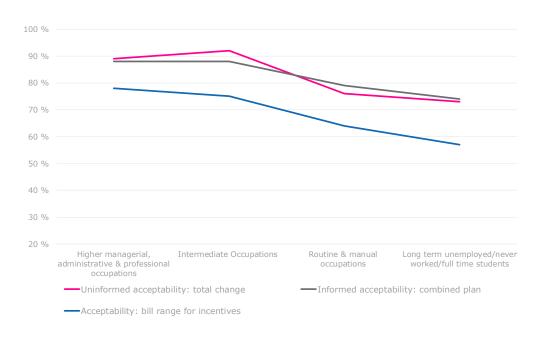

| proposed bill change unacceptable                                     |     |  |
|---|-----|--|
| Informed acceptability: water services                                |     |  |
| Already too expensive/it will still be too expensive                  | 32% |  |
| Companies should pay for service<br>improvements out of their profits | 32% |  |
| Company profits too high  | 26% |  |
| Informed acceptability: sewerage services                             |     |  |
| Company profits too high already                                      | 26% |  |
| Already too expensive/it will still be too expensive                  | 24% |  |
| Because of the price increases  | 23% |  |
| Informed acceptability: combined plan                                 |     |  |
| Already too expensive/it will still be too expensive                  | 40% |  |
| Company profits too high already                                      | 34% |  |
| The plan is poor value for money                                      | 25% |  |

Top reasons for finding aspects of

| Bill range for performance incentives  |                                      |
|--|--------------------------------------|
| It's good that the bill can reflect the level of service provided  | 51% (of those rating it acceptable)  |
| It's good because this should help get even better service improvements because<br>companies will try harder                         | 47% (of those rating it acceptable)  |
| The bill should be fixed and not be open to change as services change  | 8% (of those rating it unacceptable) |
| Uncertainty about how the bill could change each year makes budgeting for it<br>difficult and I don't know if I'll able to afford it | 6% (of those rating it unacceptable) |

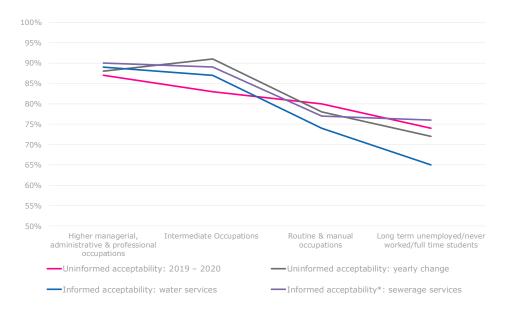

At the uninformed stage, customers who provide an 'unacceptable' / 'completely unacceptable' rating at any of the three uninformed stages are asked an open question about why they provided that rating. The most common response is that bills are already too expensive / already struggle to pay bills (29%).

# Fig1: Total change acceptability and bill range for incentives by Socio Economic Classification:

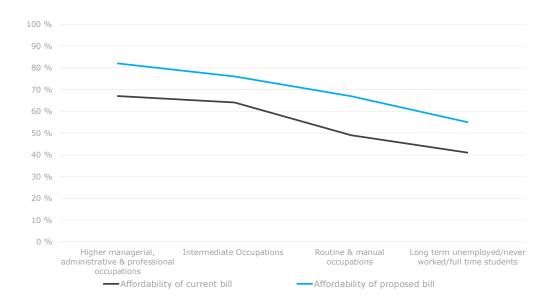

Total change acceptability trends downwards depending on Socio Economic Classification group – with those in higher groups (generally) being more likely to find the proposed bills acceptable, and those in lower groups being less likely to find the proposed bills acceptable. When looking at bill range acceptability for incentives, the same pattern of declining acceptability is evident (but not statistically significant).

# Fig2: Uninformed acceptability, 2019-20 and yearly change, and informed acceptability for water and sewerage charges:

Uninformed acceptability for the change from 2019 to 2020 is lowest among the long term unemployed / never worked / full time students and those in intermediate occupations. When looking at yearly changes (at the uninformed level), those intermediate occupations are more likely to find the proposed bills acceptable than those who are long term unemployed / never worked / students.

#### Fig3: Affordability and Priority Services Register by Socio Economic Classification:

Affordability of both the current bill and the proposed bill declines across each subsequent Socio-Economic Classification group, with those in long term unemployment/never worked/full time students being least likely to find the proposed bill affordable.

# Sample profile: Southern Water (548 interviews)

| Demographics   | Number of respondents |  |  |  |
|--|-----------------------|--|--|--|
|  | Gender                |  |  |  |
| Male   | 260                   |  |  |  |

# Notes on this document

- Instructions in CAPS are for computer programming
- Instructions in *italics* are for telephone interviewers
- **Bold** or <u>underlined</u> words are for emphasis within a question
- Different question types have different numbers:
  - Screener questions are labelled S01, S02, S03 etc.
  - $_{\odot}$  Main survey questions are labelled Q01, Q02, Q03 etc.
  - $_{\odot}~$  Further demographic / classification questions are labelled C01, C02, C03 etc.
  - Number codes are included on each question for data processing purposes

### Introduction

#### All Respondents:

This research is being carried out by DJS Research Ltd on behalf of the <u>Consumer Council</u> <u>for Water</u> which is the consumer organisation working on behalf of customers of the water companies in England and Wales. The aim of the research is to find out what people think about plans for their [water and sewerage / water] company's services for 2020-2025 and how much they will cost.

You will need to know which water company or companies provide your water and sewerage services in order to complete this survey. This can be found on your current water and sewerage bill(s) and so it would be ideal if you could have your water and sewerage bill to hand.

Before you begin, we want to tell you that every five years, water and sewerage companies write a business plan setting out how they will meet drinking water, sewerage and environmental quality standards and deliver high quality customer service.

Ofwat (the regulator for the water industry), reviews each plan and sets investment and service levels, and the prices that companies can charge their customers for these services. This is your opportunity to have your say on proposals for your company's service levels and bills before Ofwat finalises them.

Please be assured that any answer you give will be treated in confidence in accordance with the Code of Conduct of the Market Research Society and none of your comments will be attributed to you personally. Any personal information we ask for is purely to classify your answers and will not be passed back to the Consumer Council for Water or any third parties for any marketing or sales purposes.

This survey should take no more than 15 minutes to complete.

Should you have any questions about the research please contact: Matt Prince at <u>mprince@djsresearch.com</u>

# Q01. Base: All respondents

Are you solely or jointly responsible for paying the water and sewerage bill?

# SINGLE RESPONSE

| Code | Answer list                                  | Scripting notes | Routing |
|------|--|-----------------|---------|
| 1    | Yes  |                 |         |
| 2    | No, I am not responsible for paying the bill |                 | CLOSE   |

# Q02.

# **Base: All respondents**

Please tell us which water company provides your water supply...

#### SINGLE RESPONSE

| Code | Answer list                 | Scripting notes | Routi | ng |
|------|-----------------------------|-----------------|-------|----|
| 1    | Anglian Water               |                 |       |    |
| 2    | Dee Valley Water            |                 |       |    |
| 3    | Dŵr Cymru (Welsh Water)     |                 |       |    |
| 4    | Northumbrian Water          |                 |       |    |

|------|-------------|-----------------|---------|
| 1    | Yes         |                 |         |
| 2    | No          |                 |         |
| 3    | Refused     |                 |         |

#### Q010.

#### **Base: All respondents**

Please answer the next set of questions based on your current job. If you're currently not working or are retired, please base your answers on your last job.

# Do you (did you) work as an employee or are you (were you) selfemployed?

#### SINGLE RESPONSE

| Code | Answer list   | Scripting notes | Routing   |
|------|---|-----------------|-----------|
| 1    | Employee  |                 | GO TO Q11 |
| 2    | Self-employed with employees                          |                 | GO TO Q12 |
| 3    | Self-employed/freelance without<br>employees          |                 | GO TO Q14 |
| 4    | Not applicable - Long term<br>unemployed/never worked |                 | GO TO Q15 |
| 5    | Not applicable - Full time student                    |                 | GO TO Q15 |

#### Q011.

#### Base: All code 1 (employees) at Q10 (Q10/1)

How many people work (worked) for your employer at the place where you work (worked)?

#### SINGLE RESPONSE

| Code | Answer list | Scripting notes | Routing      |
|------|-------------|-----------------|--------------|
| 1    | 1-24        |                 | GO TO<br>Q13 |
| 2    | 25 or more  |                 | GO TO<br>Q13 |

#### Q012.

**Base: All code 2 (self-employed with employees) at Q10 (Q10/2)** How many people do (did) you employ?

| Code | Answer list | Scripting notes | Routing   |
|------|-------------|-----------------|-----------|
| 1    | 1-24        |                 | GO TO Q13 |
| 2    | 25 or more  |                 | GO TO Q13 |

# Base: All code 1/2 (employees / self-employed with employees) at Q10 (Q10/1\_2)

Do (did) you supervise the work of other employees on a day to day basis? (e.g. a supervisor, manager or foreman responsible for overseeing the work of other employees on a day to day basis)

#### SINGLE RESPONSE

| Code | Answer list | Scripting notes | Routing   |
|------|-------------|-----------------|-----------|
| 1    | Yes         |                 | GO TO Q14 |
| 2    | No          |                 | GO TO Q14 |

#### Q014.

Base: All code 1/2/3 (employees / self-employed with employees / self-employed without employees) at Q10 (Q10/1\_3)

What do you do for work? If you are not working now, what did you do in your last job?

#### SINGLE RESPONSE

CAPI ONLY: INTERVIEWER, IF RESPONDENT REFUSES READ OUT: I would like to reassure you that this information is only being collected to make sure we have a good mix of people included in the survey, it will not be used for any other purpose. On this basis would you be happy to tell me about the sort of work you do, or if you're not working now, what you did in your last job?

#### Q015.

#### All respondents

How much do you agree or disagree that the water and sewerage charges that you pay for are affordable to you?

# SINGLE RESPONSE

| Code | Answer list                | Scripting notes | Routing |
|------|----------------------------|-----------------|---------|
| 1    | Strongly agree             |                 |         |
| 2    | Tend to agree              |                 |         |
| 3    | Neither agree/nor disagree |                 |         |
| 4    | Tend to disagree           |                 |         |
| 5    | Strongly disagree          |                 |         |
| 85   | Don't know                 |                 |         |

# Q016.

#### All respondents

How much do you currently pay for your water and sewerage services? This can be found on your most recent bill. You should be able to see an amount for water services and a separate amount for sewerage services. Please look at your most recent bill and enter the two amounts in here, then specify how many months the bill covers [DP: Show four open numeric boxes, one for water amount and one for sewerage amount also show two open numeric boxes [MAX 12] one for water bill frequency and one for sewerage bill frequency]. [Only show if Hafren Dyfrdwy customer, Q03/1\_2] If the name of your water company has changed in the last 12 months, please think about the last bill you received.

# OPEN RESPONSE: NUMERIC. CALCULATE A YEARLY FIGURE FOR WATER AND SEWERAGE USING OPEN BOX VALUES AND FREQUENCY

# Q018.

#### All respondents not code 85 (don't know) at Q16

Is this from a bill or is this your best estimate?

# SINGLE RESPONSE

| Code | Answer list   | Scripting notes | Routing |
|------|---------------|-----------------|---------|
| 1    | From a bill   |                 |         |
| 2    | Best estimate |                 |         |

# UNINFORMED ACCEPTABILITY

# INFO2.

# Base: WaSC customers only (Q02/1-12 - only include Q2/4 if also coding Q2a/2)

The next set of questions are about proposed changes to your water and sewerage bill from the years 2020 to 2025. You will be shown a number of different figures relating to

bill changes. Each of these changes include forecast inflation of 2% a year in line with current Treasury estimates. Please read the information about inflation below before continuing.

Inflation is the rate of increase in prices for goods and services over time and it is included in all utility bills. So, if inflation is 2% in 12 months time, 4 pints of milk which are £1 now will now cost £1.02. Bear in mind that your household income (e.g. wages, benefits, state pensions, etc.) also changes each year. If it keeps up with inflation then, all other things being equal, it will match the increase in the cost of goods and services. If your household income goes up by more than inflation each year, it will generally feel like it is going further. If it doesn't keep up with inflation, it may not feel as though it going as far as it used to.

[CAPI ONLY] Please note, if you would like to refer back to this information at any point, please ask your interviewer.

We would like you to imagine that it is now the year 2020 and you have just received your bill for water and sewerage services. Please answer the following question in terms of how you would feel based on the following...

*Last year (2019) your bill was £[pull through with calculation based on current bill and 2020 formula]. It's now 2020, and your bill for the year is £[pull through with calculation based on current bill and 2020 formula].*

#### INFO3.

# Base: WoC customers only (Q02/13-24 and Q03/1)

As you get your water and sewerage services from two different companies, we are going to ask you about the bill for each service separately. When answering these questions, please think about the charge for each service separately – we will ask you about the overall bill for both services later on.

The next set of questions are about proposed changes to your **water** bill from the years 2020 to 2025. You will be shown a number of different figures relating to bill changes. Each of these changes include forecast inflation of 2% a year in line with current Treasury estimates. Please read the information about inflation below before continuing.

Inflation is the rate of increase in prices for goods and services over time and it is included in all utility bills. So, if inflation is 2% in 12 months time, 4 pints of milk which are £1 now will now cost £1.02. Bear in mind that your household income (e.g. wages, benefits, state pensions, etc.) also changes each year. If it keeps up with inflation then, all other things being equal, it will match the increase in the cost of goods and services. If your household income goes up by more than inflation each year, it will generally feel like it is going further. If it doesn't keep up with inflation, it may not feel as though it going as far as it used to.

[CAPI ONLY] Please note, if you would like to refer back to this information at any point, please ask your interviewer.

Thinking about your household bill for clean **water services**, we would like you to imagine that it is now the year 2020. Please answer the following question in terms of how you would feel based on the following...

*Last year (2019) your bill was £[pull through with calculation based on current bill and 2020 formula]. It's now 2020, and your water bill for the year is £[pull through with calculation based on current bill and 2020 formula].*

### INFORMED ACCEPTABILITY

INFO6. Base: All respondents Now we are going to show you how your water and sewerage services could change from 2020 to 2025. We would like to know how acceptable or unacceptable the proposed service changes are to you.

So, the next questions are about the **services** provided by **<WaSCs: ANSWER GIVEN AT** Q2> / **<WoCs: ANSWER GIVEN AT** Q2 which provides your water supply and **ANSWER** GIVEN AT Q4 which provides your sewerage services>.

When answering questions, please bear in mind that because you are charged for two services i.e. for water and for sewerage, you will be asked to consider these individually as there are different service levels and prices for each.

The information on the following pages shows the different water services provided by [ANSWER GIVEN AT Q2], and what they plan to improve or maintain between 2020 and 2025. Please note that the investment details shown are a snapshot of the proposals; if there is no detail shown it doesn't mean that the company isn't investing in that area.

The table also shows the total price change starting with the 2020 bill through to 2025, including inflation. When considering the price please bear in mind that your household income and inflation will also change over the next 5 years.

#### **ODI Section**

#### Q044.

# Base: All WaSC respondents (Q01/12)

We have just shown you the baseline service plan and charges proposed for your water and sewerage services from 2020 to 2025.

Sometimes, the level of service customers get is different to this baseline plan. It could be lower than in the plan, for example, because extreme weather affected water supplies or caused flooding, or the service level could end up being better because new technology means the company has become more efficient. By 2022, it will be clear whether your company is providing a service which is better or worse than planned, and your bill could change to reflect this.

#### SHOWCARD D

If [insert water company from Q02/1-12] did not meet any of these service levels, and gave you notably lower service levels than in their plan, your annual water and sewerage bill from 2022 onwards, including inflation, would go down by up to  $\pm xxx$ .

On the other hand, if [insert water company from Q02/1-12] **exceeds all of these service levels** to give you notably better service levels than in their plan, your annual water and sewerage bill from 2022, including inflation, would go up, by up to £xxx.

In practice, it's unlikely that your company would either miss all of it's service level targets, or exceed themall. Experience is that companies miss some, beat others, or are so close to the planned service level that it makes no change to the bill. So it's more likely that your bill would end up being **closer to the middle rather than at the bottom of the range ([pull through from bottom]) or at the top ([pull through from top]).** 

Thinking about this, could you please state how acceptable or unacceptable the potential bill for lower and higher service levels is to you? Please remember that your household income will also change over the five years from 2020 to 2025 – it may change in line with inflation, by less than inflation, or increase by more than inflation.

# Q046. Base: All WoC respondents (Q02/13-24 OR Q03/1)

We have already shown you the baseline service plan and charges proposed for your water services starting from the next bill in 2020 through to 2025.

Sometimes, the level of service customers get ends up being different to what has been planned. Performance against targets could end up being worse, for example, because extreme weather affected water supplies or caused flooding, or could end up being better because new technology means the company has become more efficient. By 2022, it will

be clear whether your company is providing a service which is better or worse than planned, and your bill could change to reflect this.

#### SHOWCARD D

If [insert water company from Q02/13-22 or 24 OR Q02a/1] **did not meet any of these service levels**, and gave you notably lower service levels than in their plan, your annual water bill from 2022 onwards, including inflation, would go down by up to £xxx.

On the other hand, if [insert water company from Q02/13-22 or 24 OR Q02a/1] exceeds all of these service levels to give you notably better service levels than in their plan, your annual water bill from 2022, including inflation, would go up by up to £xxx.

In practice, it's unlikely that your company would either miss all of it's service level targets, or exceed themall. Experience is that companies miss some, beat others, or are so close to the planned service level that it makes no change to the bill. So it's more likely that your bill would end up being towards the middle of this range than at the bottom or top.

Thinking about this, could you please state how acceptable or unacceptable this potential range that your bill could fall into is to you as a customer? Please remember that your household income will also change over the five years from 2020 to 2025. If it keeps up with inflation it should match the increase in cost of goods and services over time.

#### TEXT FOR SOUTH STAFFS WATER CUSTOMERS ONLY (Q02/23)

If South Staffs Water did not meet any of these service levels, and gave you notably lower service levels than in their plan, your water bill, including inflation, could go dow n. On the other hand, if they exceeded all of these service levels and gave you notably better service levels than in their plan, your water bill could go up to reflect this higher level of service. Your bill could increase by up to £2.50 a year, and go down by up to £3 a year

However, South Staffs Water propose to keep their water bills the same from 2020 to 2025 and apply any difference in the bills they could have charged from 2026 onwards – which will depend on how good their service performance was from 2020-2025. So from 2020-2025, the average household water bill will be unchanged, regardless of performance and the effect of inflation, at £xxx

Thinking about this, could you please state how acceptable or unacceptable this is to you?

#### Q048.

#### Base: All WoC respondents (Q02/13-24 OR Q03/1)

We have already shown you the baseline service plan and charges proposed for your sewerage starting from your bill in 2020 through to 2025.

Sometimes, the level of service customers get ends up being different to what has been planned. Performance against targets could end up being worse, for example, because

extreme weather affected water supplies or caused flooding, or could end up being better because new technology means the company has become more efficient. By 2022, it will be clear whether your company is providing a service which is better or worse than planned, and your bill could change to reflect this.

#### SHOWCARD D - VISUAL EXAMPLE HERE

If [insert sewerage company from Q03] **did not meet any of these service levels**, and gave you notably lower service levels than in their plan, your annual sewerage bill from 2022 onwards, including inflation, would go down by up to  $\pounds xxx$ .

On the other hand, if [insert sewerage company from Q03] **exceeds all of these service levels** to give you notably better service levels than in their plan, your annual sewerage bill from 2022, including inflation, would go up by up to £xxx.

In practice, it's unlikely that your company would either miss all of it's service level targets, or exceed themall. Experience is that companies miss some, beat others, or are so close to the planned service level that it makes no change to the bill. So it's more likely that your bill would end up being towards the middle of this range than at the bottom or top.

Thinking about this, could you please state how acceptable or unacceptable this potential range that your bill could fall into is to you as a customer? Please remember that your household income will also change over the five years from 2020 to 2025. If it keeps up with inflation it should match the increase in cost of goods and services over time.

#### Q057.

#### **Base: All respondents**

Are you on your water company's Priority Services Register? Priority services registers hold information about customers' needs for services like large print bills, or passwords, and also so that if there is a problem with their water supply, their supplier will know if they need bottled water, for example for a medical condition or if they can't get to a bottled water station.

# Showcards

#### Shown at Q033:

Southern Water

Southern Water supplies 1.1 million households with water services and 1.9 million with sewerage services, through 13,900km of water pipes and 39,700km of sewers and drains.

Southern Water's plan aims to improve the quality and reliability of water supplies by reducing water lost to leaks and helping people to use less water. It will reduce flooding from sewers, improve bathing waters and the water environment. It also aims to give more help for people in financial hardship and get more people aware of and signed up for services such as large print bills, passwords and specific help if their water supply is ever disrupted.

 Southern Water is investing £3.4 billion in services from 2020 to 2025 The average bill will fall by around 6% over five years including forecast inflation of 2% each year

 Southern Water is investing £3.4 billion in services from 2020 to 2025
 The average bill will fall by around 6% over five years including forecast inflation of 2% each year

 The main service changes are shown to the right

A snapshot of the services which the company provides is shown here. Please note in some cases figures have been rounded up or down.

# **Other services**

Please think about each of these as a service which is provided to your home, or is available to you as an individual, or which affects the environment in your area all day and every day. How acceptable or unacceptable are the levels of service you see here?

| CUSTOMER SERVICE                       | Service level in 2020   | Service level in 2025   |   |
|--|---|---|---|
| Satisfaction with<br>customer services | In the top 5 out of 21<br>water companies for<br>customer services, as<br>measured by Ofwat | In the top 5 out of 21<br>water companies for<br>customer services, as<br>measured by Ofwat | V |

| SOCIAL & OTHER SERVICES   | Service level in 2020                                      | Service level in 2025                                 |
|---|--|---|
| Increase the number of households<br>signed up for Priority Services such<br>as large print bills, passwords, extra<br>help if water supply is off etc. | 1.2% of households are signed up                           | 7% of households are signed up                        |
| Keep Priority Service records<br>up to date so that people are<br>getting the services they need<br>(90% checked every 2 years)                         | 15% of records<br>are checked                              | 90% of records<br>are checked                         |
| More customers who cannot afford their<br>water bill are given the right level of<br>financial help to enable them to pay                               | 65% of those helped<br>can then afford their<br>water bill | 90% of those helped<br>can afford their<br>water bill |

# **Performance incentives**

1

As the regulator, Ofwat monitors the performance of water companies against their targets. To encourage them to reach their targets, Ofwat instructs companies to develop performance incentives. These are based on;

2

Missed service level targets → lower bills than the baseline plan

Bills fall where targets are missed and a much lower service is given Exceeded service level targets → higher bills than the baseline plan

Bills increase where targets are beaten and a much higher service is given
